(57)Abstract:

PURPOSE: To obtain a high sales promotion effect by storing data of a perspective drawing and of an outer view of a basic building block, entering a selecting state of the perspective drawing or the outer view, reading the data of the perspective drawing or the outer view based on the entry and providing an output of image display data.

CONSTITUTION: Detailed data of a selected vehicle with a selected specification are read from an optical disk, then whether or not the data are perspective drawing or a photograph is discriminated. In the case of discrimination to be a perspective drawing, an ordering vehicle generating image on the perspective drawing base is displayed. A vehicle 403 is drawn by the 3D graphics and a photograph 405 of the vehicle is displayed in a small size to the upper left part. In the case of selection at a

position of a marker 409, data of a table set 413 are entered, and in the case of selection at a position of the marker 415, data of a kitchen set 417 are entered. After the entry of the data, an image of the table set 423 is displayed in the vicinity of a table set 413 and an image of the kitchen set 427 is displayed in the vicinity of a kitchen set 417.
